**Re:** Statewide EAV, parcel count and EAV per parcel for 2007

---

I have obtained the latest statewide statistics for EAV by county, parcel count and EAV per parcel. The listing that I have attached has been sorted based on the 2007 total EAV for all counties in the state. Additional columns have been included for each county with their respective rankings for number of parcels and the average value per parcel.

As we would expect Cook County ranks number one for total EAV and number of parcels, but interestingly not EAV per parcel. Cook's neighbor DuPage County ranks first in average EAV per parcel.

These statistics can be used in a variety of ways. We all like to know who is the biggest and who is the humblest. But of more importance, the total EAV is the base that local government taxes against. The larger the base the greater the ability to fund government. Cook County with 174 billion in 2007 EAV is the largest by 4.25 times the next largest, DuPage County. Cook also ranks number one in total parcel count with 1.8 million parcels. But when it comes to the highest per parcel value or EAV per parcel, the honors go to DuPage.

McLean County ranks 12th in total EAV, 13th in number of parcels and 11th in EAV per parcel. So putting things in perspective we have more EAV and total parcels than 88% of the county's in Illinois.

Looking at the other end of the scale we find little Hardin County, located in the Shawnee National Forest on the Ohio River has the lowest EAV in Illinois at just shy of 26 million or about one third of the amount we add annually in new construction. Brown County in Western Illinois comes in at number 102 in total parcel count with 4,865 parcels, about 1,000 parcels larger than our own rural Bloomington Township.

The distinction for lowest EAV per parcel goes to Wayne County, with \$3,696 per parcel on average which is about 7.5% of our EAV per parcel.

I sorted by total EAV because it is the least subjective statistic of the three. The number of parcels and therefore the EAV per parcel can be influenced by local policy decisions. Some counties are diligent in controlling their parcel count by combining parcels wherever practical whereas other counties have local policies that create multiple parcels in a similar situation. In general McLean County has encouraged land owners to consolidate wherever possible which has the effect of controlling the cost to maintain each parcel.

We can use this data to find comparison counties based on total EAV, but perhaps more effectively we can look for counties where the parcel count or EAV per parcel are comparable, depending on our purpose.

For instance, when we compare with Champaign County we see that they rank 13, 12 and 11 in EAV/parcel, # of parcels and total EAV respectively. We rank 11, 13 and 12 in the same categories. All in all that is a close comparison. However, when we look at the next county on the list, Peoria, they rank 17, 11 and 13. The first number, EAV/parcel tells us that while we may be similar in total parcels and total EAV, we really don't compare all that well in average value per parcel. Four counties that rank ahead of us overall, Madison, Winnebago, St Clair and Sangamon have more value and more parcels, but are weaker than us in average parcel value. Kendall, DeKalb, Boone, Ogle and Grundy all rank overall below us in total EAV but actually have higher EAV/parcel.

We can use this information to draw comparisons and test assumptions about McLean County and our relative place in Illinois. I hope you find this data interesting and I will be happy to answer your questions.

PREVAILING RATE OF PUBLIC WORKS WAGES FOR McLEAN COUNTY  
ORDINANCE

WHEREAS, the State of Illinois has enacted "An Act regulating wages of laborers, mechanics and other workmen employed in any public works by the State, county, city or any public body or any political subdivision or by any one under contract for public works," approved June 26, 1941, as amended, being Section 130/0.01 through 130/12, Chapter 820, *Illinois Compiled Statutes* (2004); and

WHEREAS, the aforesaid Act requires that the County of McLean investigate and ascertain the prevailing rate of wages as defined in said Act for laborers, mechanics and other workmen in the locality of said McLean County employed in performing construction of public works for said McLean County; now, therefore,

BE IT ORDAINED by the McLean County Board as follows:

16.01 To the extent as required by "An Act regulating wages of laborers, mechanics, and other workmen employed in any public works by the State, county, city or any public body or any political subdivision or by any one under contract for public works," approved June 26, 1941, as amended, the general prevailing rate of wages in this locality for laborers, mechanics and other workmen engaged in the construction of public works coming under the jurisdiction of the County of McLean, to the best of our knowledge and represented by the Illinois Department of Labor, is hereby ascertained to be the same as the prevailing rate of wages for construction work in McLean County areas as determined by the Department of Labor of the State of Illinois as of May 1, 2009, a copy of that determination being attached hereto and incorporated herein by reference. As required by said Act, any and all revisions of the prevailing rate of wages by the Department of Labor of the State of Illinois shall supersede the Department's June determination and apply to any and all public works construction undertaken by the County of McLean. The definition of any terms appearing in this Ordinance which are also used in aforesaid Act shall be the same as in said Act.

16.02 Nothing herein contained shall be construed to apply said general prevailing rate of wages as herein ascertained to any work or employment except public works construction of this County to the extent required by the aforesaid Act.

16.03 The County Clerk shall publicly post or keep available for inspection by any interested party in the County Clerk's Office of this County (Room 102, Government Center) this determination of such prevailing rate of wage. A copy of this determination or of the current revised determination of prevailing rate of wages then in effect shall be attached to all contract specifications.

16.04 The County Clerk shall mail a copy of this determination to any employer, and to any association of employers and to any person or association of employees who have filed, or file names and addresses, requesting copies of any determination stating the particular rates and the particular class of workmen whose wages will be affected by such rates.

(2)

The County Clerk shall promptly file a certified copy of this Ordinance with both the Secretary of State and the Department of Labor of the State of Illinois. The County Clerk shall cause to be published in a newspaper of general circulation within the area a copy of this Ordinance, and such publication shall constitute notice that the determination is effective and that this is the determination of the public body.

## Explanations

### MCLEAN COUNTY

FENCE ERECTOR - See Ironworkers.

IRONWORKERS (EAST) - That part of the county East of a diagonal line from Heyworth to a point half way between Chenoa and Weston.

TEAMSTERS (NORTH) - North of a straight line starting on the west side where Route 24 crosses McClean County line in a southeasterly direction to the most south-southwestern corner of Livingston County.

The following list is considered as those days for which holiday rates of wages for work performed apply: New Years Day, Memorial/Decoration Day, Fourth of July, Labor Day, Veterans Day, Thanksgiving Day, Christmas Day. Generally, any of these holidays which fall on a Sunday is celebrated on the following Monday. This then makes work performed on that Monday payable at the appropriate overtime rate for holiday pay. Common practice in a given local may alter certain days of celebration such as the day after Thanksgiving for Veterans Day. If in doubt, please check with IDOL.

Oil and chip resealing (O&C) means the application of road oils and liquid asphalt to coat an existing road surface, followed by application of aggregate chips or gravel to coated surface, and subsequent rolling of material to seal the surface.

### EXPLANATION OF CLASSES

#### Other Classifications of Work:

For definitions of classifications not otherwise set out, the Department generally has on file such definitions which are available. If a task to be performed is not subject to one of the classifications of pay set out, the Department will upon being contacted state which neighboring county has such a classification and provide such rate, such rate being deemed to exist by reference in this document. If no neighboring county rate applies to the task, the Department shall undertake a special determination, such special determination being then deemed to have existed under this determination. If a project requires these, or any classification not listed, please contact IDOL at 618/993-7271 for wage rates or clarifications.
